CCDI Hub Release 3.1.1

DATE OF RELEASE: OCTOBER 28, 2026

CCDI Hub version 3.1.1 includes standard monthly updates to the Molecular Characterization Initiative (MCI) page and Events Announcements, plus other content additions. Graphics were updated on the Federation and MCI resource pages, text was updated on the About and Data Usage Policies and Terms pages, and changes to supporting documentation have been made where appropriate.

Additional details are listed below:

Statistics at a Glance

v3.1.1 Summary

- **26th** Release
- **1** Event upcoming
- **8** Tools supported by CCDI
- **108** Publications supported by CCDI
- **9,222** Participants with available genomic and clinical data in MCI
- **45** Studies indexed in CCDI Explore

CCDI Hub Site Updates

General Site

- Added 1 event to the list of past events on CCDI Events Announcement page
- Fixed broken link on CCDI FAQs page
- Resolved security vulnerabilities
- Updated About page text
- Updated Date Usage Policies and Terms text
- Updated CCDI Data Federation resource page graphic
- Updated news feed with relevant entries
- Updated release notes feed and pdf with latest release details

Molecular Characterization Initiative page

- Updated enrollment through October 2, 2026
- Updated Data generation and sharing workflow graphic
- Updated list of ineligible participants as of October 2026

CCDI Hub Release 3.1.0

DATE OF RELEASE: OCTOBER 6, 2026

Version 3.1.0 of the CCDI Hub includes a variety of content additions, security updates, and redirects of legacy links to support the new CCDI Explore experience. Five new publications were added to the CCDI-Supported Publications page, and the Events Announcements page was updated with two past archived events and the successful completion of the 2026 CCDI Symposium. A broken link in the User Guide was fixed, and additional links that will no longer be supported on the CCDI Hub have been redirected to the corresponding new content on C3DC. The Molecular Characterization Initiative (MCI) page has been updated with September enrollment counts, and changes to supporting documentation have been made where appropriate.

Additional details are listed below:

Statistics at a Glance

v3.1.0 Summary

- **25th** Release
- **1** Event upcoming
- **8** Tools supported by CCDI
- **108** Publications supported by CCDI
- **9,222** Participants with available genomic and clinical data in MCI
- **45** Studies indexed in CCDI Explore

CCDI Hub Site Updates

General Site

- Added 3 events to the list of past events on CCDI Events Announcement page
- Added 5 new publications in CCDI-Supported Publications page
- Fixed incorrect link in User Guide
- Redirected old URLs for Cohort Analyzer, Data Model, Data Access Guide, Explore Dashboard, and Studies list to the new URLs in C3DC
- Resolved security vulnerabilities
- Updated CCDI Data Submission Guide (PDF)
- Updated Federation resource page content
- Updated NCCR Explorer count in CCDI Stats at a Glance on the Home page
- Updated news feed with relevant entries
- Updated release notes feed and pdf with latest release details
- Updated tool name for MCI JSON2TSV on tools page and associated help page

Molecular Characterization Initiative page

- Updated enrollment through September 14, 2026
- Updated list of ineligible participants as of August 2026

CCDI Hub Release 3.0.0

DATE OF RELEASE: SEPTEMBER 10, 2026

CCDI Hub's version 3.0.0 release features a major change to streamline the CCDI Explore experience, along with several other enhancements. Newly hosted information includes three events, seven publications, a CCDI FAQ page, and a Data Update category on News page. Notable navigation updates include the reorganization of the About dropdown menu and the removal of links to the Cohort Analyzer and Cart since these features will now be supported solely on C3DC. User documentation has been updated to support the latest set of features.

Additional details are listed below:

Statistics at a Glance

v3.0.0 Summary

- **24th** Release
- **2** Events upcoming
- **8** Tools supported by CCDI
- **103** Publications supported by CCDI
- **9,222** Participants with available genomic and clinical data in MCI
- **45** Studies indexed in CCDI Explore

CCDI Hub Site Updates

General Site

- Added CCDI Data Updates category to News and retroactively added pertinent entries from C3DC's former Announcements feed
- Added CCDI FAQs to About dropdown menu
- Added a new AI Skills section to the Federation resource page, including a diagram, supporting text, and a link to the skills file
- Added seven new publications and updated one in Publications page
- Added two events to the list of past events and one upcoming event
- Moved MCI JSON2TSV tool to CCDI-supported section in Tools page and added a help page for the tool
- Redirected Explore in navbar to the new CCDI Explore Dashboard hosted in C3DC
- Redirected Global Search results to relevant data in C3DC, where applicable
- Redirected Studies to the updated list of CCDI Studies hosted in C3DC
- Removed link to Cohort Analyzer
- Removed link to My Files Cart
- Removed Stats bar

- Reorganized About dropdown menu
- Replaced yaml with markdown files for content on CPI, Federation, Release notes, and Tools pages
- Resolved security vulnerabilities
- Updated behavior of warning click-through banner
- Updated CCDI Data Ecosystem and AI Readiness (PDF) diagram and links
- Updated CCDI Data Model viewer to display the latest CCDI Data Model
- Updated CCDI Data Submission Guide (PDF)
- Updated content on About CCDI Hub page to reflect changes to Explore
- Updated content on Data Usage Policies & Terms page to reflect changes to Explore
- Updated news feed with relevant entries
- Updated numbers in CCDI Stats at a Glance on the Home page
- Updated release notes feed and pdf with latest release details
- Updated User Guide to reflect newest features and moved Explore content to C3DC User Guide, where relevant

Molecular Characterization Initiative page

- Added DC display label to Enrollment Counts by State chart
- Updated content to reflect changes to Explore
- Updated enrollment through August 10, 2026

CCDI Hub Release 2.12.0

DATE OF RELEASE: JULY 31, 2026

CCDI Hub's July version 2.12.0 release features updates to the Resources menu, and corresponding changes to the carousel, CCDI-Supported Resources, and CCDI Stats at a Glance sections on the Home page. The Molecular Characterization Initiative (MCI) page now has an updated List of Genes Reviewed for Germline and Somatic Variation. The News and Release Notes pages are up to date.

Additional details are listed below:

Statistics at a Glance

v2.12.0 Summary

- **23rd** Release
- **42** Studies
- **61,854** Participants
- **70,820** Samples
- **1,259,864** Files

CCDI Hub Site Updates

General Site

- Removed Molecular Targets Platform (MTP) from Resources menu, carousel, CCDI-Supported Resources list, and CCDI Stats at a Glance sections on the Home page to correspond with retirement of MTP
- Updated behavior of warning click-through banner
- Updated release notes pdf with latest release and added relevant news entry

Molecular Characterization Initiative page

- Updated List of Genes Reviewed for Germline and Somatic Variation

Edited 9/10/2026 to add mention of warning banner changes

CCDI Hub Release 2.11.0

DATE OF RELEASE: JUNE 16, 2026

CCDI Hub's 2026 Q2 release includes updates to the Molecular Characterization Initiative (MCI) data and one new study: CCDI's Admixture Analysis of Acute Lymphoblastic Leukemia in African American Children - The ADMIRAL Study. New features include a Consent Codes summary on Study Details pages and Global Search results, a new button to download the Contact Form from the Pediatric, Adolescent, and Young Adult Rare Cancer Study page, keyboard interactivity for improved accessibility on the MCI page, and more. The News page is up-to-date with the latest available information.

Additional details are listed below:

Statistics at a Glance

v2.11.0 Summary

- **22nd** Release
- **42** Studies
- **61,854** Participants
- **70,820** Samples
- **1,259,864** Files

CCDI Hub Data Updates

Added Data Sets

- Childhood Cancer Data Initiative (CCDI): Admixture Analysis of Acute Lymphoblastic Leukemia in African American Children - The ADMIRAL Study (PHS004222)

Updated Data Sets

- Molecular Characterization Initiative (PHS002790)

CCDI Hub Site Updates

General Site

- Added configurable ordering of Latest Updates to support specifying left-to-right order of listed topics
- Added consent code summary to Global Search results and Study Details page
- Added two new events to the CCDI Events Announcements page
- Updated CCDI Data Ecosystem and AI Readiness PDF

- Updated Pediatric, Adolescent, and Young Adult Rare Cancer Study resource page with button to emphasize contact form
- Updated release notes pdf with latest release and added relevant news entry

Molecular Characterization Initiative page

- Added keyboard navigation and related instructions to the map graphic on the MCI page (desktop) to improve accessibility

CCDI Hub Explore Dashboard

Tables

- Fixed issue resulting in trailing close bracket on Files table Participant ID and Sample ID values

Edited 7/7/2026 to remove mention of functional shift from YAML to Markdown for source content of About and CCDI Data Usage Policies & Terms pages - this update will be made in a future release

CCDI Hub Release 2.10.0

DATE OF RELEASE: MARCH 26, 2026

The CCDI Hub 2026 Q1 release includes several updates to the Molecular Characterization Initiative (MCI) data, along with a new study: Metastatic Osteosarcoma Spatial Profiling. Functional enhancements include an enhanced CCDI Participant Index (CPI) mapping display, a new data availability matrix from the Studies listing, links to downloadable manifests and TARGET source files (where appropriate), and more. The Pediatric Molecular Target Lists (PMTL) and the CCDI Pediatric, Adolescent, and Young Adult Rare Cancer Study each have a new resource page. Publications, Tools, and News are updated, and MCI enrollment numbers are current through February.

Additional details are listed below:

Statistics at a Glance

v2.10.0 Summary

- **21st** Release
- **41** Studies
- **60,622** Participants
- **69,588** Samples
- **1,259,861** Files

CCDI Hub Data Updates

Added Data Sets

- Metastatic Osteosarcoma Spatial Profiling (PHS003975)

Updated Data Sets

- Molecular Characterization Initiative (PHS002790)

CCDI Hub Site Updates

General Site

- Added caDSR, GDC, KidsFirst, M-PACT, and PMTL to Tools page
- Added data availability matrix to Studies listing
- Added new publications, added tooltips to describe categories, and updated outdated links on Publications page
- Added Pediatric Molecular Target Lists resource page

- Added Pediatric, Adolescent, and Young Adult Rare Cancer Study resource page with contact form
- Added statistics to CPI resource page
- Added TARGET source files to relevant study details page records
- Fixed bug causing repeated consent prompt
- Made several font and styling changes to home page and menu bar, including adding alt text to carousel images, to improve user experience
- Updated global search messaging for clarity when adding participants to cohort and added downloadable manifest to global search results where applicable
- Updated release notes pdf with latest release and added relevant news entry

Molecular Characterization Initiative page

- Add caption to MCI workflow diagram
- Updated image font and styling to improve readability
- Updated MCI enrollment through February

CCDI Hub Explore Dashboard

Facets and Widgets

- Fixed bug resulting in facets remaining open across selections
- Fixed truncated Diagnosis values in widget

Tables

- Added demo and example options to Cohort Selector feature
- Updated CPI feature with multiple icons
- Updated Cohort Analyzer feature with links back to Explore
- Updated ordering of records in JSON download from Cohort Selector and Cohort Analyzer based on chronological sorting of "age_at_last_known_survival_status"

CCDI Hub Release 2.9.2

DATE OF RELEASE: FEBRUARY 19, 2026

The February 2026 patch release of the CCDI Hub includes three bug fixes, resolution of container vulnerabilities, new content on the CCDI Participant Index (CPI) page, and new organization and functionality on the Tools and Publications resource pages, respectively. Molecular Characterization Initiative (MCI) enrollment counts, publications, tools, news feed, and release notes have also been updated.

Additional details are listed below:

Statistics at a Glance

v2.9.2 Summary

- **20th** Release
- **40** Studies
- **59,795** Participants
- **68,140** Samples
- **1,238,181** Files

CCDI Hub Site Updates

General Site

- Fixed bug related to file counts on the Studies listing page
- Fixed links to the CCDI cBioPortal Cancer Data Explorer that were directing to an invalid study ID
- Resolved container vulnerabilities
- Updated description on the CCDI Participant Index (CPI) resource page
- Updated publications through the end of January, added tooltips, and fixed "Read More" links for consistent behavior
- Updated tools list with addition of STQ and added subcategories

Molecular Characterization Initiative page

- Updated MCI enrollment through January

CCDI Hub Release 2.9.1

DATE OF RELEASE: JANUARY 8, 2026

The January 2026 patch release of the CCDI Hub has provided a key update to OpenSearch. Two publications have been added along with a new tag to indicate AI applicability for relevant publications. Two tools of interest have been added to the Tools resource page and the MCI page was updated with December enrollment and a revised flow diagram. A new CCDI Data Ecosystem and AI Readiness pdf has been added to the About menu, and a news topic for this release has been added to the feed.

Additional details are listed below:

Statistics at a Glance

v2.9.1 Summary

- **19th** Release
- **40** Studies
- **59,795** Participants
- **68,140** Samples
- **1,238,181** Files

CCDI Hub Site Updates

General Site

- Added AI tag to relevant publications and added two new publications
- Added CCDI Data Ecosystem and AI Readiness pdf
- Added Methylscape and Tucan entries and links from the Tools page
- Added news entry for 2.9.1 release notes

Molecular Characterization Initiative page

- Updated MCI CCDI Data Ecosystem flow diagram
- Updated MCI enrollment through December

Edited 2/19/2026 to correct typo in release update summary

CCDI Hub Release 2.9.0

DATE OF RELEASE: DECEMBER 16, 2025

CCDI Hub's December 2025 quarterly release includes the addition of several data sets and numerous new and updated features. Eight new studies include several additions from the Gabriella Miller Kids First Pediatric Research Program and as well as the Texas Pediatric Patient Derived Xenograft study. New features on the Explore Dashboard include a toggle for age facets to display ages in days or years and a search bar on the files table to facilitate search of file name or other file attributes. The Study detail pages were updated for several datasets that may now have data in the CCDI cBioPortal Cancer Data Explorer as of its December update, and links to IDC were added for the Molecular Characterization Initiative. Standard updates to publications, MCI enrollment through November, news, and the Hub User Guide were also made.

Additional details are listed below:

Statistics at a Glance

v2.9.0 Summary

- **18th** Release
- **40** Studies
- **59,795** Participants
- **68,140** Samples
- **1,238,181** Files

CCDI Hub Data Updates

Added Data Sets

- Gabriella Miller Kids First Pediatric Research Program: An Integrated Clinical and Genomic Analysis of Treatment Failure in Pediatric Osteosarcoma (PHS001714)
- Gabriella Miller Kids First Pediatric Research Program in Genetics at the Intersection of Childhood Cancer and Birth Defects (PHS001846)
- Gabriella Miller Kids First Pediatric Research Program in Germline and Somatic Variants in Myeloid Malignancies in Children (PHS002187)
- Gabriella Miller Kids First Pediatric Research Program in Novel Cancer Susceptibility in Families (from BASIC3) (PHS001878)
- Gabriella Miller Kids First (GMKF) Pediatric Research Program in Susceptibility to Ewing Sarcoma Based on Germline Risk and Familial History of Cancer (PHS001228)
- Kids First: Genetics of Pediatric Germ Cell Tumors (PHS002322)
- Kids First Pediatric Research Study in Familial Predisposition to Hematopoietic Malignancies (PHS001738)
- Texas Pediatric Patient Derived Xenograft (PHS003215)

Updated Data Sets

- Childhood Cancer Survivor Study (CCSS) (PHS001327)
- Gabriella Miller Kids First Pediatric Research Program in Pediatric T-Cell Acute Lymphoblastic Leukemia (PHS002276)
- Human Tumor Atlas Network (HTAN) (PHS002371)
- Molecular Characterization across Pediatric Brain Tumors and Other Solid and Hematologic Malignancies for Research, Diagnostic, and Precision Medicine (PHS002517)
- Molecular Characterization Initiative (PHS002790)

CCDI Hub Site Updates

General Site

- Added new member IUSCCC to Federation workflow diagram
- Added CCDI Events Announcements page
- Implemented Federation data model navigator
- Reorganized actions available from global search results
- Updated behavior of release notes pdf access to view all release notes in a single pdf in a browser's pdf viewer
- Updated data model navigator model to current version 3.1
- Updated study details pages with new links to CCDI cBioPortal Cancer Data Explorer for relevant studies, added links to IDC/TCIA for relevant studies, and modified fonts and spacing for consistent styling and user experience
- Updated title of downloadable release notes pdf
- Updated user guide

Molecular Characterization Initiative page

- Added language to emphasize Ewing Sarcoma
- Added link to file listing ineligible participants
- Updated MCI enrollment through November
- Updated MCI image content and styling

CCDI Hub Explore Dashboard

Facets and Widgets

- Added option to view ages in years for all age-related facets
- Moved user notes to clickable pop-up available from the top of the facet section
- Updated behavior of arrow on facets to clearly indicate expansion interactivity

Tables

- Added search bar to Files tab to facilitate search of file name or other file attributes
- Updated CPI feature icon set and descriptive language to better inform user of available mappings
- Updated CPI pop-up to clearly indicate participant ID and phs ID of selected participant
- Updated display of long multi-value fields to allow for expansion and collapse

CCDI Hub Release 2.8.0

DATE OF RELEASE: SEPTEMBER 12, 2025

The 2.8.0 CCDI Hub release features a major data model update, five new studies, and the restoration of two previously temporarily removed studies. Notable model updates include the addition of genetic analysis and consent group nodes, plus the addition of a new diagnosis category property with a corresponding filter in the UI. Other new features include a reorganization of Explore Dashboard facet expansion, added columns in the tables for diagnosis category, and some additional links to the recently launched CCDI cBioPortal Cancer Data Explorer from the Molecular Characterization Initiative (MCI) resource and study details pages. Standard updates to publications, MCI enrollment through August, relevant news, and the Hub User Guide are also available.

Additional details are listed below:

Statistics at a Glance

v2.8.0 Summary

- **17th** Release
- **32** Studies
- **24,594** Participants
- **49,765** Samples
- **1,249,802** Files

CCDI Hub Data Updates

Data Model updates

- Added consent group node
- Added diagnosis category facet
- Added genetic analysis node, including IGM clinical interpretation of assay results, gene fusion, sequence variant, methylation array
- Added necrosis, tumor percent to sample node
- Removed ICD-O code from diagnosis values
- Renamed molecular test to laboratory test

Added Data Sets

- CCDI Pediatric In Vivo Testing Program - Ewing sarcoma, rhabdomyosarcoma, kidney, and liver cancers (PHS003160)
- CCDI Pediatric In Vivo Testing Program - Sarcomas and other Solid Tumors (PHS003161)
- Clonal evolution during metastatic spread in high-risk neuroblastoma (PHS003111) – Restored

- CCSS SMN Genomic Analysis (PHS001327)
- Feasibility and Clinical Utility of Whole Genome Profiling in Pediatric and Young Adult Cancers (PHS002620) – Restored
- Gabriella Miller Kids First Pediatric Research Program in Pediatric T-Cell Acute Lymphoblastic Leukemia (PHS002276)
- Pediatric Molecular Analysis for Therapy Choice (PHS002883)

Updated Data Sets

- *All studies were updated with consent group
- CCDI Pediatric In Vivo Testing Program – Leukemia (PHS003164)
- CCDI Pediatric In Vivo Testing Program – Neuroblastoma (PHS003163)
- Genomic Analysis in Pediatric Malignancies (PHS002430)
- Genomic Sequencing and Spatial Transcriptome Analysis of Pediatric Rhabdomyosarcoma (PHS000720)
- Identification and Targeting of Treatment Resistant Progenitor Populations in T-cell Acute Lymphoblastic (PHS003432)
- Molecular Characterization Initiative – Molecular Characterization Initiative (PHS002790)
- NCI CCSG CCDI Supplement Additional Genomic Submission (PHS002599)
- Pediatric Preclinical Testing Consortium (PPTC) PDX Data Models (PHS001437)
- TARGET: Acute Lymphoblastic Leukemia (ALL) Pilot Phase 1 (PHS000463)
- TARGET: Acute Lymphoblastic Leukemia (ALL) Expansion Phase 2 and Acute Leukemia of Ambiguous Lineage (ALAL) Phase 3 (PHS00464)
- TARGET: Acute Myeloid Leukemia (AML) (PHS000465)
- TARGET: Cancer Model Systems (MDLS): Cell Lines and Xenografts (including PPTP) (PHS000469)
- TARGET: Kidney, Clear Cell Sarcoma of the Kidney (CCSK) (PHS000466)
- TARGET: Kidney, Rhabdoid Tumor (RT) (PHS000470)
- TARGET: Kidney, Wilms Tumor (WT) (PHS000471)
- TARGET: Neuroblastoma (NBL) (PHS000467)
- TARGET: Osteosarcoma (OS) (PHS000468)
- UCSF Database for the Advancement of JMML - Integration of Metadata with Omic Data (PHS002504)

CCDI Hub Site Updates

General Site

- Added links to CCDI cBioPortal Cancer Data Explorer from MCI resource and study details page
- Updated global search to make new nodes and properties searchable
- Updated MCI Enrollments by Diagnosis table and Enrollment Counts by State chart
- Updated news cards based on latest information
- Updated Publications page with additional cards
- Updated User Guide with new features

CCDI Hub Explore Dashboard

Facets and Widgets

- Added facet for Diagnosis Category
- Fixed bug to maintain most recent filters when clicking "Explore" from the top menu
- Reorganized facet layout to maintain frozen top-level facet menu with horizontal expansion of submenu

Tables

- Added columns for Diagnosis Category in Participants and Samples tables
- Updated CPI feature to use live API call to CPI service to display real-time information
- Removed special characters from downloadable study manifests

Edited 9/16/2025 to correct error in dataset count summary

CCDI Hub Release 2.7.1

DATE OF RELEASE: AUGUST 4, 2025

With the latest 2.7.1 release, CCDI Hub now includes links to the newly launched CCDI cBioPortal Cancer Data Explorer, a CCDI-hosted cBioPortal instance tailored to support pediatric cancer researchers and clinicians. Additional feature enhancements include numerous improvements to the Explore Dashboard, Cohort Analyzer, Global Search, Molecular Characterization Initiative (MCI), and Tools pages. Routine updates to publications, MCI enrollment, and relevant news are also available.

Additional details are listed below:

CCDI Hub Site Updates

General Site

- Added links from the Home page and menu to the CCDI cBioPortal Cancer Data Explorer
- Fixed placement of the Global Search banner
- Improved mobile header and layout for the MCI page
- Improved the Cohort Analyzer and underlying Cohort Selector features with better handling of long cohort names, streamlined participant management, updated messaging, and behavior of save interactions
- Reorganized Resources menu and updated Tools page content
- Updated news cards based on latest information
- Updated MCI Enrollments by Diagnosis table and Enrollment Counts by State chart
- Updated Publications page with additional cards
- Updated Global Search Participants records with CPI mappings to enable direct addition of files to cart

CCDI Hub Explore Dashboard

Facets and Widgets

- Improved behavior of “Clear All Filtered Selections” button to include text-based filters
- Updated the binning logic of Age at Diagnosis to improve chart interpretation

Tables

- Fixed typo in Cohort Selector deletion message and made other improvements in cohort management to support Cohort Analyzer function as described above
- Implemented backend support for upcoming improvements to cohort imports from C3DC

CCDI Hub Release 2.7.0

DATE OF RELEASE: JUNE 30, 2025

The CCDI Hub 2.7.0 release includes several major feature additions and updates along with new clinical data for the Molecular Characterization Initiative (MCI) study. Five new pages have been added for the Cohort Analyzer, Data Model Navigator, Studies Listing, Study Details, and Tools. Other new features include three new help resources: an in-page web help browser for the Explore Dashboard, a guide for data submission, and a video tutorial for how to use the Explore Dashboard. Enhancements include updated coverage and organization of global search results, function to display and copy the URL constructed from facet selections, and standard updates to publications, MCI enrollment, and user guide.

Additional details are listed below:

CCDI Hub Data Updates

Updated Data Sets

- Added participants, samples, diagnoses; data for survival, treatment, and treatment response; and files for clinical measure, methylation array, and sequencing - Molecular Characterization Initiative (PHS002790)

CCDI Hub Site Updates

General Site

- Added new About menu items for CCDI Data Submission Guidelines pdf and Hub Explore Dashboard Video Tutorial
- Added new pages for Cohort Analyzer, Data Model Navigator, Studies Listing, Study Details, and Tools
- Improved mobile experience from Home page
- Increased global search indexing to cover more metadata and improved organization of and interaction with search hits
- Updated Federation page graphic and content
- Updated Publications page
- Updated MCI Enrollments by Diagnosis table and Enrollment Counts by State chart
- Updated news cards based on latest information
- Updated User Guide with new features

CCDI Hub Explore Dashboard

Facets

- Added a dedicated help browser above the facets to browse and navigate help topics within the page
- Added buttons to show, hide, and copy the query URL built from the facet selections
- Removed magnifying glass button from Demographics facet label to streamline usability

Tables

- Added buttons for selecting and adding files to cart from and implemented filter for better display of synonyms in the CPI popup
- Added message to indicate that columns
- Implemented support for importing cohorts from C3DC

CCDI Hub Minor Release 2.6.1

DATE OF RELEASE: MAY 14, 2025

CCDI Hub minor release 2.6.1 features numerous enhancements and fixes, plus minor update to two studies and their downloadable manifests. In the Explore Dashboard, all summary widgets have been updated to have a more intuitive default display and the Diagnosis chart has been updated to display only the top 20 diagnoses until a user applies any filters. A note has been added to the CCDI Participant Index (CPI) pop-up from the Participants table to direct them to the downloadable Studies manifest for all mapping details. MCI enrollments have been updated through April and recent publications have been added. A bug resulting in a blank page loading from an old release notes entry was fixed.

Additional details are listed below:

CCDI Hub Data Updates

Updated Data Sets

- Removed synonyms and replaced incomplete study manifest - Genomic Analysis in Pediatric Malignancies (PHS002430)
- Added two study level files and replaced incomplete study manifest - CCDI Pediatric In Vivo Testing Program - Leukemia (PHS003164)

CCDI Hub Site Updates

General Site

- Updated Publications page
- Updated MCI Enrollments by Diagnosis table and Enrollment Counts by State chart
- Restored blank redirect link from 2.3.0 release notes

CCDI Hub Explore Dashboard

Widget updates

- Changed default emphasized section of pie charts to be the section with the highest count for all widgets
- Changed Diagnosis widget to display only the top 20 diagnoses by count upon initial page load, preserving interactive and dynamic updates upon user input in facets
- Made all widget charts downloadable

Tables

• Added a note in the CPI pop-up to direct users to the Synonyms sheet in the downloadable study manifests in the Studies tab for all CPI mappings

CCDI Hub April 2025 Quarterly Release

DATE OF RELEASE: APRIL 8, 2025

The 2.6.0 quarterly release (April 2025) of the CCDI Hub features a modified data model, new data, and new features for browsing and selecting cohorts. Three new data sets have been added from TARGET, Acute Lymphoblastic Leukemia (ALL) Pilot Phase 1 (PHS000463), Acute Lymphoblastic Leukemia (ALL) Expansion Phase 2 (PHS000464), and Acute Myeloid Leukemia (AML) (PHS000465), and a field has been added to capture study status. Participants who were no longer eligible were removed from Molecular Characterization Initiative (PHS002790) and TARGET: Kidney, Wilms Tumor (WT)(PHS000471) studies. Explore Dashboard facet updates include a new facet for the study status property, propagation of facet text search to Sample Anatomic Site, and an increase of the participant set upload limit to allow for upload of 5,000 Participant IDs. Numerous updates have been made to the Explore Dashboard Participants table, including new fields, customizable columns, a feature for creating cohorts, and mapping of associated information from the CCDI Participant Index (CPI). The Molecular Characterization Initiative (MCI) page has been updated with February 2025 enrollment summaries and a new link to a COG transformation script in a GitHub repository. General updates include new links from the Home page and Resources menu, a dedicated Release Notes page, and more.

Additional details are listed below:

CCDI Hub Data Updates

Data Model Updates

- Added more properties to Treatment node
- Added slim_url property for IDC imaging data
- Added study status
- Renamed "COG Clinical Report" to "COG Clinical Data"
- Updated synonym properties to include CPI mapping data

New Data Sets

- CCDI Pediatric In Vivo Testing Program - Neuroblastoma (PHS003163)
- TARGET: Acute Lymphoblastic Leukemia (ALL) Pilot Phase 1 (PHS000463)
- TARGET: Acute Lymphoblastic Leukemia (ALL) Expansion Phase 2 (PHS000464)
- TARGET: Acute Myeloid Leukemia (AML) (PHS000465)

Updated Data Sets

- CCDI Pediatric In Vivo Testing Program - Leukemia (PHS003164)
- Comprehensive Genomic Sequencing of Pediatric Cancer Cases (CMRI/KUCC) (PHS002529)
- Enhancement of Data Sharing in Pediatric, Adolescent and Young Adult Cancers (PHS002431)
- Genomic Sequencing of Pediatric Rhabdomyosarcoma (PHS000720)

- Identification and Targeting of Treatment Resistant Progenitor Populations in T-cell Acute Lymphoblastic (PHS003432)
- Integrating Longitudinal Clinical, Sociodemographic and Genomic Data into the NCCR (PHS002677)
- Molecular Characterization across Pediatric Brain Tumors and Other Solid and Hematologic Malignancies for Research, Diagnostic, and Precision Medicine (PHS002517)
- Molecular Characterization Initiative (PHS002790)
- OncoKids - NGS Panel for Pediatric Malignancies (PHS002518) TARGET: Cancer Model Systems (MDLS): Cell Lines and Xenografts (including PPTP) (PHS000469)
- TARGET: Kidney, Clear Cell Sarcoma of the Kidney (CCSK) (PHS000466)
- TARGET: Kidney, Rhabdoid Tumor (RT)(PHS000470) TARGET: Kidney, Wilms Tumor (WT)(PHS000471)
- TARGET: Neuroblastoma (NBL) (PHS000467)
- TARGET: Osteosarcoma (OS) (PHS000468)
- UCSF Database for the Advancement of JMML - Integration of Metadata with Omic Data (PHS002504)

Removed Data Sets

- Feasibility and Clinical Utility of Whole Genome Profiling in Pediatric and Young Adult Cancers (PHS002620)
- Clonal evolution during metastatic spread in high-risk neuroblastoma (PHS003111)

CCDI Hub Site Updates

General Site

- Added tab under News page for release note notifications
- Added ecDNA resource block on Home page and menu link from Resources menu
- Added dedicated page to display full release notes
- Made persistent link to user guide from About menu
- Updated user guide

Molecular Characterization Initiative (MCI) page

- Added link to COG transformation script GitHub repository
- Increased text thickness to improve readability
- Fixed bug resulting in unintended outlines when interacting with donut chart
- Removed alt text unintentionally appearing in main page text under image
- Updated enrollment counts as of February 2025

CCDI Hub Explore Dashboard

Facet updates

- Added facet for study status
- Added text search option to sample anatomic site facet
- Increased participant set upload limit to 5,000

Tables

- Added cohort selector feature to Participants tab
- Added column to display study status
- Added commas to all numbers larger than 1,000 in table headers and pagination
- Added fields from Treatment, Treatment Response, and Survival nodes to Participants tab
- Added indicator, hover dialog, and popup table summary for participants with additional information mapped in the Cancer Participant Index (CPI)
- Changed column label "Sex" to "Sex at Birth" to match model
- Exposed properties under generic_file node
- Made visible columns customizable by checkbox selection
- Removed separate Diagnosis tab and moved relevant fields to Participants and Samples tabs

Cart

- Added commas to all numbers larger than 1,000 in table headers and pagination and in cart icon

CCDI Hub Minor Release 2.5.1

DATE OF RELEASE: FEBRUARY 12, 2025

CCDI Hub Data Updates

Updated Data Sets

- Feasibility and Clinical Utility of Whole Genome Profiling in Pediatric and Young Adult Cancers (PHS002620)
- Clonal evolution during metastatic spread in high-risk neuroblastoma (PHS003111)

CCDI Hub Site Updates

General Site

- Updated casing of NCCR Data resource link from menu
- Merged Applications and Other Resources menu into single Resources menu
- Added news card for Childhood Cancer Data Catalog December 2024 release
- Added news card for CCDI Data Federation Resource API updated
- Added new publication to Publications page
- Updated layout of Publications page to include PubMed ID and Journal Title
- Updated MCI Enrollments by Diagnosis table and Enrollment Counts by State chart
- Updated MCI page description of how to access data
- Restored obsolete link out from MCI page
- Updated layout of Home page for mobile responsiveness
- Updated User Guide

CCDI Hub Explore Dashboard

Facet updates

- Updated button layout for text search option for Diagnosis and Diagnosis Anatomic Site subfacets
- Increased number of returnable records in Participant ID facet search

Tables

- Renamed Access column to Manifest in Studies table

CCDI Hub Release (2.5.0)

DATE OF RELEASE: DECEMBER 18, 2024

The 2.5.0 CCDI Hub release includes new data, enhancements to the Explore Dashboard, and new features in both the Explore Dashboard and My Files Cart. Multiple studies from TARGET are new to the Hub in this release. Explore Dashboard functionality has been improved with the addition of a text search capability for diagnosis and diagnosis anatomic site facets; new facets for treatment, treatment response, and survival, as well as new subfacets for data category; and reorganization of all facets for better usability. The My Files Cart now includes an option for direct export of a manifest to the Velsera Cancer Genomics Cloud for further analysis. Additional changes include a new CCDI-supported Publications page and updates to the About Page, Hub User Guide, Home page resources, and MCI enrollment.

Additional details are listed below:

CCDI Hub Data Updates

New Data Sets

- TARGET: Cancer Model Systems (MDLS): Cell Lines and Xenografts (including PPTP) (PHS000469)
- TARGET: Kidney, Clear Cell Sarcoma of the Kidney (PHS000466)
- TARGET: Kidney, Rhabdoid Tumor (PHS000470)
- TARGET: Kidney, Wilms Tumor (PHS000471)
- TARGET: Neuroblastoma (PHS000467)
- TARGET: Osteosarcoma (PHS000468)

Updated Data Sets

- Comprehensive Genomic Sequencing of Pediatric Cancer Cases (PHS002529)
- Molecular Characterization across Pediatric Brain Tumors and Other Solid and Hematologic Malignancies for Research, Diagnostic, and Precision Medicine (PHS002517)
- Molecular Characterization Initiative (PHS002790)

CCDI Hub Site Updates

General Site

- Added NCCR Data Platform resource block, link on Home page, and link from menu
- Updated resource links on Home page to be in alphabetical order
- Updated Applications menu items to be in alphabetical order
- Updated Enrollments by Diagnosis table and Enrollment Counts by State chart
- Updated User Guide and added new link to About menu

- Added CCDI-Supported Publications page to About menu

CCDI Hub Explore Dashboard

Facet updates

- Organized facet categories to match C3DC order, where possible
- Added text search option for Diagnosis and Diagnosis Anatomic Site subfacets
- Added facets for Treatment, Treatment Response, and Survival
- Added File Mapping subfacet for Data Category

Widgets

- Improved x-axis label on Age at Diagnosis to have age range visible for all ranges

Tables

- Removed Last Known Survival Status from Diagnosis table to match model update (this property is now in Survival node)
- Added File Access and File Mapping columns to Files table

My Files Cart

- Added option to export manifest directly to Cancer Genomics Cloud

Note: Release notes for version 2.5.0 were adapted from an email communication sent directly to stakeholders on 12-18-2024 and first linked in the Hub on 3-31-2025.

CCDI Hub Release (2.4.0)

DATE OF RELEASE: OCTOBER 10, 2024

CCDI Hub release 2.4.0 includes substantial data changes and both new and enhanced features. Notably, the data model has been modified to remove deprecated properties, add new properties, and improve organization of properties within nodes, and CCDI Inventory data have been updated and loaded conforming to the augmented model. In addition to model-related changes, data updates may include new synonyms, funding information, publication, sequencing files availability, enrollment, diagnoses, and other study-level changes. A new resource page has been added for the CCDI Participant Index (CPI), and an option to export all file metadata from the Explore dashboard has been added to the Studies tab. Enhanced features include an Assay Type widget to replace the deprecated Ethnicity widget in the Explore dashboard and other font and contrast updates throughout the site to improve 508 compliance.

Additional details are listed below:

CCDI Hub Data Updates

New Data Sets

- CCDI Pediatric In Vivo Testing Program – Leukemia (PHS003164)
- T-cell Acute Lymphoblastic Leukemia Single Cell RNA Sequencing and ATAC Sequencing (PHS003432)
- Childhood Cancer Data Initiative (CCDI): Single-Cell Atlas of NF1 Nerve Sheath Tumors (PHS003519)

Updated Data Sets

- Genomic Sequencing of Pediatric Rhabdomyosarcoma (PHS000720)
- Pediatric Preclinical Testing Consortium (PPTC) PDX Data Models (PHS001437)
- Human Tumor Atlas Network (HTAN) Primary Sequencing Data (PHS002371)
- Childhood Cancer Data Initiative (CCDI): Genomic Analysis in Pediatric Malignancies (PHS002430)
- Childhood Cancer Data Initiative (PHS002431)
- UCSF Database for the Advancement of JMML - Integration of Metadata with "Omic" Data (PHS002504)
- Childhood Cancer Data Initiative (CCDI): Integration of genomic and clinical data from unique rare cancer datasets to facilitate data sharing (PHS002517)
- Childhood Cancer Data Initiative (CCDI): OncoKids - NGS Panel for Pediatric Malignancies (PHS002518)
- Childhood Cancer Data Initiative (CCDI): Free the Data: Open Sharing of Comprehensive Genomic Childhood Cancer Datasets (Kansas) (PHS002529)
- NCI CCSG CCDI Supplement Additional Genomic Submission (PHS002599)

- Feasibility and Clinical Utility of Whole Genome Profiling in Pediatric and Young Adult Cancers (PHS002620)
- Integrating Longitudinal Clinical, Sociodemographic and Genomic Data into the NCCR (PHS002677)
- Childhood Cancer Data Initiative (CCDI): Molecular Characterization Initiative (PHS002790)

CCDI Hub Site Updates

General Site

- Added CCDI Participant Index (CPI) resource page
- Updated menu with link to new page
- Updated color contrast and other typographical elements throughout the application to adhere to 508 guidelines

CCDI Hub Explore Dashboard

Facet updates

- Replaced “Vital Status” facet label with “Last Known Survival Status” (also in Diagnosis table)
- Split Library Source into Library Source Material and Library Source Molecule and added subfacets to the new molecule facet category
- Removed Ethnicity and updated Race with new subfacets
- Removed Diagnosis Verification Status

Widgets

- Replaced Ethnicity with Assay Type

Study Table

- Replaced “Study Short Title” column label with “Study Name”
- Added function to download all metadata files

Sample and Diagnosis Tables

- Removed Diagnosis, Diagnosis Verification Status, Diagnosis Basis, Diagnosis Comment columns from Sample table
- Added Sample ID column to Diagnosis table

Note: Release notes for version 2.4.0 were adapted from an email communication sent directly to stakeholders on 10-10-2024 and first linked in the Hub on 3-31-2025.

CCDI Hub Release (2.3.2)

DATE OF RELEASE: AUGUST 30, 2024

CCDI Hub minor release 2.3.2 features a fix to the query that will restore the file count in the Explore Dashboard to the correct count matching the files in the database at any time. The Molecular Characterization Initiative (MCI) page was updated to reflect August MCI enrollment counts and minor enhancements to the flow diagram. News topics were also updated, including the announcement of the August Childhood Cancer Data Catalog release and correcting to the 2.3.1 release date to 8/7/2024.

Details are listed below:

CCDI Hub Site Updates

General Site

- Added Application Update for the August Childhood Cancer Data Catalog release to News
- Corrected date of CCDI Hub 2.3.1 release Site Update from August 5, 2024, to August 7, 2024, in News

Molecular Characterization Initiative (MCI) page

- Updated enrollment counts for August
- Updated language in the MCI CCDI Data Ecosystem flow diagram

CCDI Hub Explore Dashboard

Statistics Bar and Results Tables

- Updated query that was including non-file objects in the file counts displayed in both the Stats bar and the Files tab; updated count matches database file count

Note: Release notes for version 2.3.2 were adapted from an email communication sent directly to stakeholders on 08-30-2024 and first linked in the Hub on 3-31-2025.

CCDI Hub Release (2.3.1)

DATE OF RELEASE: AUGUST 6, 2024

CCDI Hub minor release 2.3.1 includes multiple new and enhanced features with no new data updates. New features include a descriptive page for and links to the recently launched CCDI data federation API, hyperlinked dbGaP study IDs and additional support text notes in the Explore Dashboard, and a new Data Usage Policies and Terms page. Enhancements include modified labeling of the “Stats at a Glance” summary on the Home page and updated enrollment counts with corresponding dates in the Molecular Characterization Initiative (MCI) page, as well as improved mobile responsiveness for the MCI page.

More details on the latest updates are listed below:

CCDI Hub Site Updates

General Site

- Updated Stats at a Glance in Home page with qualifying note to clarify potential discrepancy between counts of data currently in the Hub and total enrollment at a given time
- Modified MCI menu label in navigation bar to remove “for Childhood Cancers”
- Added Data Usage Policies & Terms page, accessible under the About menu in the navigation bar

Molecular Characterization Initiative (MCI) page

- Added “as of” dates in tables to indicate the date the counts were updated
- Updated the List of Genes Reviewed for Germline and Somatic Variation
- Updated Chart, Table, and Map with July enrollment numbers
- Implemented mobile responsiveness

CCDI Hub Explore Dashboard

Results Tables

- Hyperlinked dbGaP accessions in Study ID column in Explore Dashboard
- Fixed bug to restore sorting in Files Tab
- Added note below tables to remind users that data have not been independently validated

Note: Release notes for version 2.3.1 were adapted from an email communication sent directly to stakeholders on 08-06-2024 and first linked in the Hub on 3-31-2025.

CCDI Hub Release (2.3.0)

DATE OF RELEASE: JUNE 26, 2024

In this release, the CCDI Hub updated several and added two new data sets. These changes encompass 1,600 participants and 2,700 samples, with 20,760 new files. The MCI page now features updated visualizations and a streamlined navigation pane. The Files tab on the Explore Dashboard has added new columns for Library Selection, Source, and Strategy. User Documentation is available from the About dropdown on the Hub Home page, providing instructions for accessing controlled data and navigating the Explore Dashboard.

A detailed breakdown of the new features and other updates is listed below:

CCDI Hub Data Updates

New Data Sets

- Pediatric AYA Cancer Touchstone (PHS002431)
- Pediatric Tumor Profiling (PPTC) (PHS002677)

Updated Data Sets

- Pediatric Preclinical Testing Consortium (PPTC) (PHS001437)
- Genomic Analysis in Pediatric Malignancies (PHS002430)
- Genomic Characterization: Juvenile Myelo Monocytic Leukemia (PHS002504)
- OncoKids Cancer Panel: Pediatric Cancers (PHS002518)
- Comprehensive Genomic Sequencing: Pediatric Cancers (PHS002529)
- Whole Genome & Transcriptome Profiling: Pediatric and Young Adult Cancers (PHS002620)
- Childhood Cancer Data Initiative (CCDI): Molecular Characterization Initiative (PHS002790)
- Molecular Characterization during Clonal Evolution: High-risk Neuroblastoma (PHS003111)

CCDI Hub Site Updates

General Site

- Added 'An official website of the United States government' banner to the top of each page in the application
- Added standard federal warning banner before granting user access to the site
- Updated search engine optimization and indexing settings to promote better visibility from related queries in open search engines
- Added Data Use Guide to the About menu
- Added Childhood Cancer Clinical Data Commons to the Applications menu
- Updated site logo with newest image file

- Updated news items

Molecular Characterization Initiative (MCI) page

- Updated label and values in the Enrollments in MCI by Diagnosis Type chart and added the adjacent table to accompany it
- Consolidated topic index with three primary headings and shortened topic titles where possible
- Updated MCI workflow image to include COG Project: EveryChild

CCDI Hub Explore Dashboard

Visualization Dashboard

- Added note to remind users not to attempt to reidentify individuals based on the information presented in the dashboard
- Updated faceted search values for Anatomic site and removed undesired elements from facet selection list
- Reordered chart positions for more intuitive layout

Results Tables

- Added a second horizontal scroll bar at the bottom of the tables for each tab using horizontal scrolling
- Added three new library-related data columns to the Files table: Library Selection, Library Source, and Library Strategy
- Added export option for JSON format
- Updated Diagnosis and Samples tabs with new values for Anatomic Site
- Added units to the Age at Sample Collection column on Samples tab

Cart

- Updated file name for manifest export

Note: Release notes for version 2.3.0 were adapted from an email communication sent directly to stakeholders on 06-26-2024 and first linked in the Hub on 3-31-2025.

CCDI Hub Release (2.2.0)

DATE OF RELEASE: MARCH 28, 2024

The Childhood Cancer Data Initiative (CCDI) Hub is excited to announce the Explore Dashboard has been updated to use CCDI Data Model version 1.7.2. This new data model facilitated numerous updates to the Dashboard, notability greater precision for participant diagnoses. This update also introduces two new visualizations to the CCDI Molecular Characterization Initiative (MCI) page, a Donut chart of enrollment by diagnosis type and a USA map Bubble chart of enrollment counts by state.

The CCDI Hub is also excited to announce the addition of 4 new datasets and updates to 2 existing datasets, the CCDI Molecular Characterization Initiative and Pediatric Brain Tumor Atlas. These 6 datasets include the addition of over 1,600 new participants; 3,100 new samples; and almost 30,000 new files.

There are many other improvements that enhance the site and Explore Dashboard usability which are detailed below:

CCDI Hub Data Updates

New Datasets

- Genomic Sequencing of Pediatric Rhabdomyosarcoma (PHS000720)
- Pediatric Preclinical Testing Consortium (PPTC) (PHS001437)
- Human Tumor Atlas Network (HTAN) (PHS002371)
- Childhood Cancer Data Initiative (CCDI): Genomic Analysis in Pediatric Malignancies (PHS002430)

Updated Datasets

- CCDI Molecular Characterization Initiative (PHS002790)
- Pediatric Brain Tumor Atlas (PHS002517)

CCDI Hub Site Updates

General Site

- Updated Carousel and Menu bar links to navigate directly to the site or resource.
- Update the ‘CCDI Stats at a Glance’ section so that the dataset counts for Childhood Cancer Data Catalog (CCDC) updates automatically when the CCDC site updates.
- Updated the About page text.
- Updated the design of the ‘Page not found’ page.
- Improved visual response for tablet and mobile browsing of the Global Search and ‘Page not found’ pages.

Molecular Characterization Initiative (MCI) page

- Two new Enrollment visualizations have been added to the MCI Page
- A Donut chart of Enrollment in MCI (APEC14B1-MCI) by Diagnosis Type
- A USA map Bubble chart of Enrollment Counts by State
- The 'Go to Site' link renamed to 'Request Access (dbGaP)." No change in linked location.
- Updated the text of the 'How can MCI data be accessed through the CCDI Data Ecosystem?' section.

CCDI Hub Explore Dashboard

Faceted Search & Breadcrumb

- The Faceted search and breadcrumb are now visually linked by category color.
- Illogical faceted search queries, i.e. selecting Sex=male and searching for a female PID, will now properly display.
- 'Sex' replaced 'Gender' within the Demographics category.
- 'Diagnosis Classification,' 'Diagnosis Classification System,' 'Diagnosis Verification Status,' and 'Diagnosis Basis' have replaced 'Diagnosis (ICD-O)' in both the Diagnosis and Samples categories.
- 'Disease Phase' now appears after at the diagnosis data elements in the Diagnosis category.
- 'Age at collection (days)' now appears as the first item in the Samples category.
- The 'Library' category was renamed to 'Sequencing Library.'

Visualization Dashboard

- The 'Diagnosis' donut chart label was updated from 'Diagnosis (ICD-O)' and displayed responses are now derived from CCDI data model element *diagnosis_classification* and not the retired *element diagnosis_icd_o.*
- The Age at Diagnosis (years) Histogram label was updated to be Participant from Subject.
- The 'Sex' donut chart label was updated from 'Gender' and displayed responses are now derived from CCDI data model element *sex_at_birth* and not the retired element *gender*.

Results Table

- 'Sex' replaced 'Gender' on the Participants tab.
- 'Diagnosis Classification,' 'Diagnosis Classification System,' 'Diagnosis Verification Status,' 'Diagnosis Basis,' and 'Diagnosis Comment' have replaced 'Diagnosis (ICD-O)' in both the Diagnosis and Samples tabs.
- A disclaimer was added to the bottom of the results table to note that participants may have participated in one or more studies and may not be unique.

Note: Release notes for version 2.2.0 were adapted from an email communication sent directly to stakeholders on 03-28-2024 and first linked in the Hub on 3-31-2025.

CCDI Hub Release (2.1.0)

DATE OF RELEASE: DECEMBER 12, 2023

The Childhood Cancer Data Initiative (CCDI) Hub is excited to announce the addition the CCDI Hub's Molecular Characterization Initiative (MCI) page and an update to the "My Files" shopping cart manifest to make it directly importable in the Cancer Genomics Cloud (CGC).

There are many other improvements that enhance the site and Explore Dashboard usability which are detailed below:

CCDI Hub Site Updates

Molecular Characterization Initiative (MCI) page

- A new page was added the CCDI Hub to share information about the MCI study. The page includes:
- Frequently asked questions about MCI
- A dataflow diagram of the MCI study
- Searchable tables of *Genes Reviewed for Germline and Somatic Variation and Gene Targets included in this Assay*
- Contact information for results &data

General Site

- Improved visual response for tablet and mobile browsing of the Home and News pages.
- Improved color contrast, labeling, and structure across the site to enhance accessibility and consistency.

CCDI Hub Explore Dashboard

"My Files" Shopping Cart

- Reformatted the shopping cart downloadable manifest file to be importable in the Cancer Genomics Cloud (CGC)
- Manifest files are now compatible with CGC's GA4GH Data Repository Service (DRS) with updated DRS URI formatting.
- The 'Download Manifest' button is no longer available when the cart is empty.
- Added external link indicator to linked text

Explore Page

- Faceted search query response times improved.
- A spinner will now appear as a visual indicator when the tool is updated for a faceted selection.

- Facet search will now display incompatible search combinations if they are created by selecting and deselecting multiple facets
- The Participant and Diagnosis tabs were updated to use Study ID, replacing Study Accession.
- Updated Participant tab column order updated to mirror the facet data element order.
- Diagnosis information, on the Diagnosis tab, was renamed to be Diagnosis (ICD-O), formerly ICD-O Morphology.
- Fix issue where the Anatomic Site column on Diagnosis tab was not sorting correctly.
- On the Studies tab, the *Diagnosis (Top 5), Diagnosis Anatomic Site (Top 5), and File Type (Top 5)* can now be expanded to show the full list if items with a 'Read more' and 'Read less' link.
- Updated pagination formatting for site consistency.

Note: Release notes for version 2.1.0 were adapted from an email communication sent directly to stakeholders on 12-12-2023 and first linked in the Hub on 3-31-2025.

CCDI Hub Release (2.0.0)

DATE OF RELEASE: OCTOBER 31, 2023

The Childhood Cancer Data Initiative (CCDI) Hub is excited to announce the addition of a new Participant & File Explore Dashboard. This new tool allows users to explore CCDI supported data in new ways and make connections with participants, samples, and files available through the NCI's Cancer Genomics Cloud (CGC).

The initial release of the CCDI Hub Explore Dashboard includes 8 CCDI supported studies and information on over 4,100 participants, 10,350 samples, and 132,000 files. The following Studies are included in this release:

1. Genomic Characterization: Juvenile Myelo Monocytic Leukemia (PHS002504)
2. Molecular Characterization: Pediatric Brain Tumors & other Cancers (PHS002517)
3. OncoKids Cancer Panel: Pediatric Cancers (PHS002518)
4. Comprehensive Genomic Sequencing: Pediatric Cancers (PHS002529)
5. Genomic Landscape: Acute Myeloid Leukemia (PHS002599)
6. Whole Genome & Transcriptome Profiling: Pediatric and Young Adult Cancers (PHS002620)
7. CCDI's Molecular Characterization Initiative (PHS002790)
8. Molecular Characterization during Clonal Evolution: High-risk Neuroblastoma (PHS003111)

The new Explore Dashboard allows for single-study and cross-study discovery, building information cohorts on filtered metrics of interest.

A participant-centric faceted search tool allows users to filter the available information based on six categories – Demographics, Diagnosis, Samples, Data Category, Study, and Library. Each category includes unique data elements that allow for targeted filtering.

For both filtered and non-filtered data, the Explore Dashboard shares data in charts and on a data table. The Explore Dashboard includes visualizations for six different data elements - Study, Diagnosis (ICD-O), Age at Diagnosis (years), Race, Gender, and Ethnicity. Each visualization adjusts as filter selections are made.

The data table displays information on five unique tabs - Participants, Diagnosis, Studies, Samples, and Files. Each tab includes different data elements and adjusts as filter selections are made. The data table allows users to export the cohort results in two different ways for further exploration and analysis. Each tab of the data table includes an 'Export' button that will download a CSV that includes the filtered or non-filtered information shown on the tab.

Additionally, each row of the data table is selectable, and each selection can be used to populate the File-Centric Cart. Selections can be made at the study level, the participant level, the sample level, or at the individual level. Once populated, the file-centric cart can be used to create a CSV manifest file of the curated files found using the tool Explore Dashboard. This curated manifest can then be used within CGC to facilitate easier selection of CCDI files with the Cancer Data Service Explorer.

Note: Release notes for version 2.0.0 were adapted from an email communication sent directly to stakeholders on 10-31-2023 and first linked in the Hub on 3-31-2025.

CCDI Hub Release (1.2.0)

DATE OF RELEASE: AUGUST 23, 2023

The CCDI Hub has been updated with several data and news updates.
Detailed information on the update is included below:

CCDI Stats at a Glance

- Childhood Cancer Data Catalog
- Cataloged Datasets updates from 223 to ***250***
- Molecular Characterization Initiative for Childhood Cancer
- Participants Updated from 1,303 to ***1,552***

Latest Updates/News

- New Item: August Childhood Cancer Data Catalog release goes live
- Describing the August CCDC release
- New Item: Molecular Targets Platform (MTP) release allows interactive data visualizations
- Describing the new interactive plot displays and updates to the About page are part of the MTP 2.1
- New Item: Childhood Cancer Data Catalog (CCDC) updates include a guide for accessing CCDI data
- Describing the July CCDC release
- New Item: Childhood Cancer Data Catalog updates with new resources and datasets
- Describing the June CCDC release

Note: Release notes for version 1.2.0 were adapted from an email communication sent directly to stakeholders on 08-23-2023 and first linked in the Hub on 3-31-2025.

CCDI Hub Release (1.1.0)

DATE OF RELEASE: JUNE 6, 2023

The CCDI Hub has been enhanced with several updates and improvements.
Detailed information about these updates is provided below:

CCDI Stats at a Glance

- Childhood Cancer Data Catalog
- Cataloged Datasets updates from 222 to ***223***
- Molecular Characterization Initiative for Childhood Cancer
- Participants Updated from 1,145 to ***1,303***
- Molecular Targets Platform
- Potential Pediatric Molecular Targets updated from 51,618 to ***58,867***

Latest Updates/News

- New Item: Molecular Characterization and Clinical Data from Multiple Organizations Released
- Describing the data release from the Children's Brain Tumor Network, the Pacific Pediatric Neuro-Oncology Consortium, and the Children's Hospital of Philadelphia.
- New Item: Childhood Cancer Data Catalog update includes new resource
- Describing the May update to the CCDC
- New Item: Molecular Targets Platform releases data updates and enhanced features
- Describing the recent update to the MTP platform

Site Improvements

- Improved Section 508 Compliance
- Added alternative text to site images
- Added form label text to search and email input fields
- Added descriptive text to images with links
- Increased color contract for selectin indicator on Navbar and on News page.
- Adjusted Home and News page elements to improve spacing and positional consistency. Update the About page to include responsive design for phones, tablets, and desktops of different sizes.
- This update does not include responsive design to the Header, Navbar, and Footer. These will be in the next update.

Note: Release notes for version 1.1.0 were adapted from an email communication sent directly to stakeholders on 06-07-2023 and first linked in the Hub on 3-31-2025.

CCDI Hub Release (1.0.0)

DATE OF RELEASE: MAY 10, 2023

We are excited to announce the Childhood Cancer Data Initiative (CCDI) Hub is now available!

This release features the four primary Hub pages – Home, Search, New, and About. Each section is described in greater detail below:

Home Page

The Home page has 4 sections, (1) the Hero section with the carousel, (2) the "Stats at a Glance" section, (3) the Latest Updates section and (4) the Explore section.

The Hero Section includes

- Brief introductory text
- A link to the CCDI Hub About page (About CCDI Hub) and a link to the CCDI page on cancer.gov (About CCDI)
- A carousel of resources available to link to from the site.
- The carousel will automatically scroll vertically (4 sec) and can be advanced by selecting to up or down arrows at the top and bottom of the carousel.
- Selecting an arrow will change the direction the carousel moves
- Any time you hover on the carousel it will pause and not advance. If you remove your cursor it will restart.
- The resource name of the middle three slide on the carousel is a clickable link that will open a new window for that resource.

The Stats at a Glance Section includes:

- Selected counts from selected CCDI resources

The Latest Updates Section includes:

- A very brief highlight of CCDI related information

The Explore Section includes:

- Brief descriptions of CCDI Resource and Others Applications
- Selecting any part of the Resource – icon, name, description – will open a new window to the selected resource.

General

From every page of the site, users can access the header/menu bar, document search, the footer, and a Back to Top button.

The Header/Menu bar includes

- A link to each site page – Home, News, About
- Dropdown menu for both Applications and Other Resources.

- Selecting an item on the Dropdown menu will navigate the user to the Home page Explore section. Users can review resources and navigate to the resource of interest from that section of the Home page as well.
- A link to the CCDI page as part of the incorporation of Adobe Analytics

The Document Search (within the Header) includes:

- A search of site text elements from the Home, News, and About pages
- No restriction on character length

The Footer includes:

- An upper footer with
- Links to CCDI About information (Hub and CCDI)
- A contact email link for CCDI (NCIChildhoodCancerDataInitiative@mail.nih.gov)
- Links to NIH policy documents
- A sign up for the CCDI newsletter
- A lower footer with
- Links to NCI and NCI affiliated social media
- A contact us section with the CCDI email
- Links to HHS, NIH, NCI, and USA.gov

The Back to Top button includes:

- A button that will appear on any page in the lower right-hand corner of the window once a user scrolls down.
- Selecting the button will take the user back to the top of the page they are on.

News

The News page shares news and information about the CCDI, its associated resources, and other CCDI or NCI programs where cross-promotion would be beneficial.

The News page includes

- A complete listing of news and updates posted to the Hub.
- Each item includes a Title, Date, and a brief description
- Filters across the top to further sort the available items.
- All – All items on the News page
- Default filter
- Announcements – Items that announce any new or important information
- News & Other – Items that are related to CCDI, NCI, or other connections of importance
- Application Update – Items that capture updates to CCDI Applications or linked resources
- Site Update – Items that capture updates to the CCDI Hub site.

About The About page contains a brief description of the CCDI Hub and the larger CCDI with links back to the cancer.gov CCDI page.

Note: Release notes for version 1.0.0 were adapted from an email communication sent directly to stakeholders on 05-10-2023 and first linked in the Hub on 3-31-2025.
